**Minister-in-charge: The Hon'ble Sir Bijoy Prasad Singh Roy, Kt.**

No. 40781 P.H.—19th October 1936.—In exercise of the powers conferred by clauses (m) and (p) of section 138 of the Bengal Local Self-Government Act of 1885 (Bengal Act III of 1885), the Government of Bengal (Ministry of Public Health) are pleased to make the following rules in supersession of the rules published with notification No. 439-L.S.-G., dated the 11th February 1918, as subsequently amended:—

**Rules for the preparation and execution of projects for water-supply, sewerage or drainage by district boards.**

1. *Definition.*—In these rules—

- (a) "District Engineer" means the Engineer appointed by the district board.
- (b) "Chief Engineer" means the Chief Engineer, Public Health Department.
- (c) "Sanitary Board" means the persons for the time being appointed, either by name or by official designation, by the Local Government by notification in the *Calcutta Gazette* to constitute a Sanitary Board.

2. *Preparation of sketch of project.*—(1) Whenever a district board desires to undertake a project for water-supply or sewerage, or a comprehensive scheme of surface drainage, or the improvement or extension of existing works of this description, it shall first cause to be drawn up a sketch of the project roughly showing its scope and estimated cost, if such project—

- (a) involves an estimated cost exceeding Rs. 5,000; or
- (b) is part of larger project the estimated cost of which exceeds Rs. 10,000; or
- (c) is such that financial assistance of the Local Government is desired.

(2) Such sketch may be drawn up—

- (a) by the Chief Engineer, at the request of the district board; or
- (b) by any private firm approved by the Chief Engineer; or
- (c) by the District Engineer; or
- (d) by any other officer in the employ of the district board or by an officer specially appointed by the district board for the purpose, subject in either case to the selection of such officer being approved by the Chief Engineer.

(3) In cases (b) to (d) referred to in sub-rule (2), the sketch of the project, while in course of preparation, shall be subject to examination and amendment by the Chief Engineer.

(4) The Chief Engineer shall, in all cases, act as adviser of the district board.

3. *Submission of sketch, statement and application.*—(1) When the estimated cost of any scheme, or of any larger scheme of which it forms a part, exceeds Rs. 10,000, or when the financial assistance of

the Local Government is desired, the district board shall submit the sketch of the project prepared under rule 2 to the Sanitary Board through the Commissioner of the Division, together with a statement wherein shall be shown the amount of the funds available to meet the capital and recurring cost of the project from current revenue or by way of loan or from any other source.

(2) The Sanitary Board, after considering the project, shall forward it to the Local Self-Government Department of Government for decision as to administrative approval with such recommendations as they may think fit, and, if the project relates to local areas under the control of two or more local bodies, with proposals for the distribution of the cost.

(3) When the estimated cost of any scheme, or of any larger scheme of which it forms a part, exceeds Rs. 5,000 but does not exceed Rs. 10,000, and when the financial assistance of Local Government to the scheme is not required, it shall not be necessary for a district board to obtain the administrative approval of the Local Government to such scheme; but the Chief Engineer shall be consulted and the scheme with a copy of the Chief Engineer's opinion on it shall be submitted to the Commissioner for information.

4. *Conditions precedent to obtaining administrative approval of the Local Government to a project.*—In order to obtain the administrative approval of the Local Government to any such project, the district board shall satisfy the Local Government—

- (1) that the cost of maintenance of the projected work can be met by the district board from its own revenue;
- (2) that any loan required to meet the cost of the work can be repaid, together with the interest thereon, within the period that may be prescribed by the Local Government; and
- (3) that the work can be done effectually in the manner and for the cost proposed.

5. *Procedure after grant of administrative approval: preparation of detailed plans and estimates.*—(1) When the administrative approval of the Local Government has been obtained to the project (but in no case before such approval, except with the previous sanction of the Local Government), the district board may arrange for the preparation of detailed plans and estimates, and for this purpose may—

- (a) apply for the services of the Chief Engineer, or
- (b) with the previous sanction of the Chief Engineer—
  - (i) entrust the work to a private firm; or
  - (ii) entrust the work to the District Engineer; or
  - (iii) cause the plans and estimates to be prepared by any other officer in the employ of the district board, or by an officer specially appointed for the purpose, subject in either case to the selection of such officer being approved of by the Chief Engineer, who shall first satisfy himself that the officer is fully qualified for the work in question.

(2) In case (a) referred to in sub-rule (1) application shall not be made for the preparation of plans and estimates for alternative schemes, unless the district board at the same time undertakes to pay for each such scheme the fees laid down in rule 30.

(3) In case (b) referred to in sub-rule (1), the plans and estimates, while in course of preparation, shall be subject to examination and amendment by the Chief Engineer.

(4) When land has to be acquired, the officer preparing the scheme shall send necessary particulars of such land to the Collector of the district and shall obtain from him an estimate of the cost of its acquisition. This estimate shall be submitted with the main scheme as a separate estimate.

6. *Submission of detailed plans and estimates for approval.*—(1) The detailed plans and estimates shall, on completion, be forwarded by the district board in duplicate to the Sanitary Board through the Commissioner of the Division or for information to the Commissioner of the Division as the case may be, together with, in the former case, a report on the state of public feeling in regard to the scheme and, if a loan is required, with an application in the prescribed form, and, in the latter case, a copy of the Chief Engineer's opinion on the scheme as finally drawn up.

(2) If the scheme is a drainage scheme the estimates shall be submitted in forms to be obtained from the office of the Chief Engineer.

(3) When the scheme has not been prepared in the office of the Chief Engineer, it shall be accompanied by full details of the calculations of the size and strength of the various works and complete information as to the prices on which the estimates have been based.

(4) The Sanitary Board shall submit the scheme as finally drawn up to the Local Self-Government Department of Government for approval, with an expression of their opinion (a) on its merits and (b), if a loan is required, on the terms of such loan.

7. *Submission of proposals for rules regulating house-connections.*—If the scheme includes projects with the intention of allowing house-connections, the district board shall, within three months of submitting the detailed plans and estimates under rule 6, submit proposals for rules under section 138 of the Act regulating house-connections.

8. *Final sanction of schemes.*—The Local Government may either sanction or reject the scheme as submitted by the Sanitary Board or may refer it, with such proposals for amendment as it may think fit, to the Sanitary Board.

9. *Commencement of work.*—No work shall be commenced on the project, nor shall any agreement be entered into in respect thereof, until the detailed plans and estimates have received the final sanction of the Local Government under rule 8.

10. *Sanction to heavy excesses over detailed estimates.*—If at any time during the progress of the work the district board has reason to anticipate that the sanctioned detailed estimate will be exceeded by more than 10 per cent., or if it shall at any time appear to the district board that the sanctioned detailed scheme will require material alteration, the district board shall forthwith submit to the Local Government for sanction a revised scheme with revised estimates and plans.

The revised estimates and plans shall be prepared—

(a) in the case of schemes prepared and carried out by a firm of engineers of established reputation, or by an officer specially appointed for the purpose under rule 5 (1) (b) (i) or 5 (1) (b) (iii) and rule 12 (2) (a), by the firm of engineers or the engineer so appointed, and shall be scrutinized by the Chief Engineer.

(b) in the case of schemes prepared and carried out by the District Engineer under rules 5 (1) (b) (ii) and 12 (2) (b), by that officer and shall be scrutinized by the Chief Engineer.

(c) in all other cases, by the Chief Engineer.

11. *Taking over of complete supervision and control by Chief Engineer.*—(1) The Chief Engineer shall have complete supervision and control of the carrying out of all schemes of water-supply, sewerage and drainage towards which the Local Government make a grant amounting to Rs. 50,000 or more, or to half the total cost of the scheme, or more. The district board shall undertake to pay the fees specified in rule 32 before work on the scheme is begun.

(2) In other cases the district board may request the Chief Engineer to take over supervision and control of the work, and on the district board undertaking to pay the fees specified in rule 32, the Chief Engineer shall, if he considers that he can do so without detriment to the public service, take over such supervision and control.

(3) Works, of which the complete supervision and control are taken over by the Chief Engineer under sub-rule (1) or sub-rule (2), shall be considered as contribution works and shall be carried out by the Engineering Branch of the Public Health Department under the rules regarding such works in paragraphs 210 to 214 of the Bengal Public Works Department Code (1st edition), except that the provision made in the Code for establishment, etc., will be covered by the fees specified in rule 32 hereof, or shall be met by the district board by payment of such fees as the Local Government may from time to time prescribe.

(4) In addition to the above fees the district board shall bear all law charges on behalf of the Local Government in any suits brought by contractors or others in connection with the execution of any project under this rule:

Provided that no charge shall be payable by the district board under sub-rule (4), if, in the opinion of Local Government, the suit is due to the malfeasance or negligence of the Chief Engineer or an officer subordinate to him.

(5) The district board shall be given an opportunity of seeing the terms of any contract for the execution of such work before it is executed. The Chief Engineer shall consider any remarks made by the district board as to the terms of the contract and if he is unable to accept the remarks shall submit the matter to the Local Government for decision.

12. *Conditions as to detailed engineering supervision.*—(1) Where the projected work is estimated to cost more than Rs. 10,000, adequate provision for detailed engineering supervision shall be a condition precedent to the grant of final sanction by the Local Government under rule 8.

(2) Save as otherwise expressly directed by the Local Government—

(a) the work shall be carried out under the supervision of an engineer, either permanently employed by the district board, or specially employed for the purpose, assisted by an adequate establishment of properly qualified overseers, the name and qualifications of the engineer having been previously submitted to the Chief Engineer, and approved by him; or

- (b) with the previous approval of the Chief Engineer, the work shall be carried out under the supervision of the District Engineer and his staff; or
- (c) the work shall be carried out under the complete supervision and control of the Chief Engineer in the manner provided in rule 11.

(3) In cases (a) and (b) referred to in sub-rule (2), the work while in progress shall be subject to inspection and control by the Chief Engineer.

13. *Report by district board to the Chief Engineer in case of small work.*—Where the work is estimated to cost not more than Rs. 10,000 and where a grant or loan has been taken from the Local Government, the district board shall report to the Chief Engineer, the agency by which it is proposed to have such works carried out, and shall follow the instructions issued by the Chief Engineer in the matter.

#### *Tenders and Contracts.*

14. *Procedure to be followed in case of other works.*—In the case of works carried out under clause (a) or clause (b) of rule 12 (2) the procedure provided by rules 15 to 26 shall be followed.

15. *Preparation of drawings, specifications, forms of tender, etc.*—When requested by the district board, the Chief Engineer shall, subject to the payment of the fees mentioned in rule 30, prepare working or contract drawings, specifications, estimates, bills or quantities, forms of tender, or other documents or plans required for the execution of schemes, which have been duly sanctioned and which are to be let out by contract, as well as forms of advertisement inviting tenders for such works.

16. *Approval of Chief Engineer to drawings, specifications, forms of tenders, etc.*—When drawings, specifications, bills of quantities, forms of tender and other documents or plans referred to in rule 15 relating to any work are not prepared by the Chief Engineer, such drawings, specifications, bills of quantities, forms of tender and other documents or plans, shall be submitted to him for his approval in writing before tenders for the contract of such work are advertised for.

*Note (i).*—The terms of a contract shall be precise and definite and there shall be no ambiguity or room for misconstruction therein.

*Note (ii).*—When necessary, legal and financial advice shall be taken in regard to the nature and form of a contract before it is finally accepted.

*Note (iii).*—The standard form of a contract shall be adopted wherever possible, and its terms shall be adequately scrutinized before it is finally accepted.

*Note (iv).*—Provision shall be made in contracts for safeguarding properties belonging to Government or local bodies when such properties are entrusted to a contractor.

17. *Advertisements inviting tenders.*—Every advertisement for tenders shall be published in one or more newspapers and shall briefly describe the works required to be carried out and state the place or places where plans and drawings can be seen, and copies of the specifications and forms of tender can be obtained, the deposit to be paid by any person making a tender, and the date and hour up to which tenders will be received.

18. *Approval of plans, drawings, specifications, forms of tender, etc., by the district board.*—All plans, drawings, specifications, bills of quantities, forms of tender and advertisements shall be formally approved by the district board in meeting. Whenever the district board desires to make any alteration in any one of such documents, the Chief Engineer shall be informed and his advice obtained with regard to such alteration.

19. *Submission and receipt of tenders.*—All tenders shall be submitted in sealed covers addressed to the Chairman or the Vice-Chairman of the district board, who shall attend in person at the office of the district board, or at any other place to which it has been directed that tenders shall be forwarded, at the latest hour specified in the advertisement for the receipt thereof. Any tender received after such hour shall not be considered.

20. *Opening and numbering of tenders.*—The Chairman or the Vice-Chairman of the district board shall himself open the tenders, shall number each tender, and shall note thereon the exact time at which it was opened.

21. *Checking and scrutiny of tenders.*—After the tenders have been opened, they shall be—

- (i) sent to the Chief Engineer; or
- (ii) in the case of works carried out under rule 12 (2) (a) under the supervision of an engineer approved by the Chief Engineer as being competent to advise on these questions, handed to that officer; or
- (iii) in the case of works carried out under rule 12 (2) (b) under the supervision of the District Engineer, handed to that officer,

for check and scrutiny:

Provided that, in case (ii) or (iii), the engineer employed by the district board or the District Engineer, as the case may be, shall, in case of difficulty or uncertainty, consult the Chief Engineer.

22. *Return of tenders, after check and scrutiny.*—The Chief Engineer, or the engineer employed by the district board, or the District Engineer, as the case may be, shall, after checking and scrutinizing the tenders, return them to the district board with his remarks and recommendations.

23. *Consideration of tenders.*—The district board shall in meeting consider the tenders when checked and scrutinized under rule 22, and either accept one of them provisionally or, if the district board thinks it desirable, refer the matter to the Chief Engineer for advice.

24. *Acceptance of tender.*—No tender shall be accepted which is not in order, is not fully priced out, and is not in every way in accordance with the instructions contained in the advertisement inviting such tenders. If the person making a tender makes in it after its submission any reduction or any alteration other than the correction of a palpable arithmetical error, that tender shall be out of order and shall not be considered. In cases where the lowest tender is not accepted the reasons for such non-acceptance shall be recorded, and in accepting a tender the financial status of the contractor shall be taken into consideration in addition to all other relevant matters.

25. *Discharge of tenders and advertisement for fresh tenders.*—If it is found that none of the tenders submitted is satisfactory, or if for

any reason it is believed that the conditions of submitting tenders have not been properly understood, so that fair tenders have not been received, all such tenders shall be discharged and fresh tenders shall be advertised for.

26. *Provisional acceptance and submission of tenders to the Chief Engineer.*—Except in the case of tenders for works involving a cost not exceeding Rs. 500, every tender after it is provisionally accepted, shall be submitted to the Chief Engineer, for final approval, together with all other tenders received for the work, and until such approval has been received no tender shall be finally accepted by the district board:

Provided that, in case of a difference of opinion between the district board and the Chief Engineer, in regard to the acceptance of a particular tender, the matter shall, if the district board so desires, be referred to the Chief Engineer, Roads and Buildings, whose decision shall be final and binding on all parties.

27. *Placing and acceptance of contracts.*—Whenever practicable, contracts shall be placed only after tenders have been openly invited. Even in cases where a formal written contract is not made, no orders for supplies shall be placed without a written agreement as to the price of the articles supplied. No contract involving an uncertain and indefinite liability, or containing any condition of an unusual nature, shall be accepted without the previous approval of the district board at a meeting. The terms of the contract, once accepted, shall not be materially varied without the previous consent of the district board.

28. *Bengal Public Works Department Code to apply to certain works.*—Works carried out under the complete supervision or control of the Chief Engineer under rule 12 (2) (c) shall be governed *mutatis mutandis* by the rules contained in paragraphs 175 to 180 of the Bengal Public Works Department Code (1st edition), and the Chief Engineer shall have the powers of a Superintending Engineer, Public Works Department, as defined in Government orders Nos. 126P.H. and 777P.H., dated the 14th January 1931 and 1st April 1932, respectively.

29. *Examination of contracts by audit authorities.*—The audit authorities shall have power to examine contracts and to report to the Local Government any cases where competitive tenders have not been called for, or where high tenders have been accepted, or where other irregularities in procedure have come to light.

#### Fees.

30. *Fees.*—For the services of the Chief Engineer specified in column 1 of the following table, the fees shown opposite in column 2 shall be payable by the district board:—

Nature of work. 1	Fees. 2

Provided that when the Chief Engineer prepares both (a) detailed estimates and drawings and (b) contract drawings, specifications and forms of tender in respect of the same works, an inclusive fee of 3 per cent. on the estimated cost of such works shall be payable.

*Note 1.*—In calculating the fees the cost of survey, land acquisition and supervision shall be excluded from the estimated cost.

*Note 2.*—These fees shall be included in the estimates and recovered by debit to the works as a first charge on the scheme.

*Note 3.*—The district board shall pay these fees in cash in accordance with the procedure laid down in article 426 of the Audit Code, if it abandons the detailed scheme at any time, or if, after budget provision has been made for the purpose, it is unable to commence the work within six months or such longer period as the Local Government may be pleased to allow of the final sanction of the scheme.

*Note 4.*—Under rule 5 fees are to be paid for the preparation of alternative plans and estimates for which application is made by the district board: but revision by the Chief Engineer on his own initiative of plans and estimates previously prepared by him with a view to effect economy or improvements does not amount to the preparation of an alternative scheme for the purpose of this rule.

31. *No charge for services of the Chief Engineer, or his assistants for preparation of sketch of project.*—When the preparation of the sketch of a project is undertaken or supervised by the Chief Engineer under rule 2, no charge shall be made for his services or for those of his assistants, or for the services of Government surveyors, draftsmen and tracers engaged in such work, and drawing materials and instruments required for such work shall be provided at Government expense:

Provided that the district board shall render all reasonable assistance on the spot in supplying survey coolies and survey pegs and in fixing bench-marks, etc., and shall pay the actual cost of the same, and shall also, in each case, provide a suitable office properly furnished for the use of the Government surveyors and draftsmen.

*Note.*—The expenditure on land acquisition shall not be included in the calculation referred to in sub-rule (2).

**Bills introduced in the Bengal Legislative Council, Reports of Select Committees presented or to be presented to that Council, and Bills published before introduction in that Council.**

### **BENGAL LEGISLATIVE COUNCIL DEPARTMENT.**

#### NOTIFICATION.

No. 2499L.C.—28th October, 1936.—With reference to the footnote at the end of the Report of the Select Committee on the Bengal Non-Agricultural Lands Assessment Bill, 1936, published with notification No. 2471L.C., dated the 16th October, 1936, in Part IV of the *Calcutta Gazette* of the 22nd October, 1936, it is hereby notified for general information that Rai Bahadur Satyendra Kumar Das, M.L.C., has subsequently signed the said Report subject to the following minute of dissent.

K. ALI AFZAL, *Asst. Secy.*,  
*for Secy. to the Bengal Legis. Council*  
*(on leave).*

**Minute of dissent by Rai Bahadur Satyendra Kumar Das, M.L.C., on the Bengal Non-Agricultural Lands Assessment Bill, 1936.**

This Bill has been framed with a view to providing a means of securing proper assessment on non-agricultural lands. It has not at all taken into consideration the principle of moderate assessment, which would be apparent from the important declaration made in the second paragraph of Regulation VII of 1822, which is the basis of this Bill. The declaration therein runs as follows:—

“Whereas a moderate assessment being equally conducive to the true interests of the Government and to the well-being of its subjects, it is the wish and intention of Government that in revising the existing settlement, the efforts of the Revenue-Officers should be chiefly directed not to any general and extensive enhancement of the *jama*.”

This policy of moderate assessment has been completely abandoned by the sub-clauses (c) and (d) of clause 4.

Under the above two sub-clauses, the Revenue-Officer shall take into consideration, in estimating a fair and equitable rent—

- (c) the market value of land immediately before the order under section 3 was made;
- (d) the rent which would be payable if the rate were fixed at four *per cent.* of such value.

This Bill will apply specially to urban areas, where the majority of houses are residential, as it excludes non-agricultural lands occupied by persons, whose primary means of livelihood is agriculture, from the purview of this Act. The effect of these two sub-clauses will be simply ruinous specially to residential tenants in municipal towns. The market value of land, being always of a fluctuating nature, cannot and should not be any criterion or guide for the assessment of rent. It depends upon several factors, specially the existing rent of the holding. People may purchase or otherwise acquire such lands in towns with a right of renewal in the honest belief that Government will not enhance the rent of such holdings beyond reasonable limits on the basis of the existing rent, in proportion to the previous rate of enhancement, if any, as they naturally believe that what is true of a private landlord is also true of the Government. This belief mainly accounts for the market value of such land, otherwise no reasonable man would purchase such land if there is any prospect of an inordinate enhancement of rent assessed on the basis of the value, which he had paid. As soon as there is an excessive enhancement, the market value is bound to fall to an abnormal extent. Would the Government then reduce the rent? Then again if the rent is reduced, there might be a rise again in the market value. The result would be a vicious circle.

People with small incomes are living in the houses they had built on such lands from the time of their ancestors or occasionally let them out on hire. To charge such people with any *percentage* of the market value of land as rent would not only cause inconceivable hardship to them but in the long run it would be impossible for them to retain the property. Recently, the Collector of Dacca has issued notices upon such tenants enhancing their rent, and in case they do not execute any *kabuliyat* at the enhanced rate, they would be ejected. The enhancement is made on the basis of half to one and half *per cent.* of the market value, the result being an inordinate enhancement, in some cases coming up to a little more than or about 40 times the existing rent, *e.g.*, from Rs. 4 to Rs. 163, from Re. 1-5 to Rs. 56-8, from Rs. 14-4 to Rs. 496-11, and so forth. If one and half *per cent.* of the market value enhances the rent to such absurd limits, any comment on the enhancement at four *per cent.* of the market value is needless.

Next although sub-clauses (c) and (d) are matters for consideration along with other sub-clauses of clause 4, it is extremely doubtful whether in estimating a fair and equitable rent, the Revenue-Officer would be in a position to dispassionately consider the other sub-clauses in preference to the almost mandatory provisions of the sub-clauses (c) and (d).

Reference may be made to the provisions of section 104A of the Bengal Tenancy Act, which deal with *khas mahal* agricultural tenancies, where the Revenue-Officer, when required to settle fair rents *has to start with the existing rents*, and maintain or enhance or reduce them, as the case may be, keeping in view the principles of the sections specified in the proviso.

Section 104H(6) of the said Act enacts that the Civil Courts shall be guided by the rents of the tenures or holdings of the same class for settling a fair rent and not the market value. Section 27 of the said Act provides that the existing rent should be presumed to be fair and equitable, until the contrary is proved. All these provisions engender a feeling of security among tenants and induce them to make improvements in their holdings. Existing rents, therefore, in my opinion, should be the basis of an enhancement; and not the market value. Assessment of rent at any *percentage*, not to speak of four *per cent.* of the market would result in such an excessive and inordinate enhancement that very few tenants would be able to pay, the outcome of

which will be ejectment. It may be observed that in the *khas mahal* lands situated in towns, the owners are required to pay municipal taxes and other charges over and above the ground rent. Such charges with a ground rent at four *per cent.* of the market value would in most cases be equivalent to and sometimes exceed the gross rental containing buildings, at which the holding may be reasonably expected to let. The tenant would not only lose the land but also the structures for his inability to pay the absurd rent.

Reference may also be made to the letter of the Hon'ble Board of Revenue at Calcutta where it enunciated the principle for renewing leases of homestead lands in the town of Dacca. It stated that the lease should be renewed on liberal terms, that householders should not be placed in a position of less security than that of similar householders occupying private *zemindari* lands, and that it is not the desire of Government to make a profit out of the necessities of the householders on the renewal of their leases. Following the above rule laid down by the Board, the then Commissioner of the Dacca Division is said to have given an assurance at the time of granting Wari leases that there was no fear of an undue increase. The aforesaid principle enunciated by the Board was subsequently embodied and endorsed by the Government of India in its Resolution, dated the 7th October, 1895.

In the province of Bihar, the rule that is followed in regard to the renewal of leases of similar lands, is that at each renewal, the enhancement shall not exceed a certain percentage of rent paid for the previous term, not exceeding double the previous rent. Market value was not considered by the Bihar Government as a basis of assessment. It is, therefore, meet and proper that the above two sub-clauses (c) and (d) of clause 4 should be deleted or in the alternative, a proviso should be added to clause 4 to the effect that a fair and equitable rent, in case of land held by a tenant immediately under Government, which is or has been let out for erecting buildings for purposes of residence or used as a residential house, shall in no case exceed fifty *per cent.* of the existing rent. Such a proviso is absolutely necessary for the protection of the residential tenants holding lands by erecting buildings.

**Clause 13.**—This clause provides for a suit in the Civil Court by a tenant aggrieved by an entry in the assessment roll and specifies certain grounds on which only a suit can be instituted. It rules out the right of the tenant to contest in the Civil Court the assessment on the ground that it is unfair, inequitable and excessive or that the market value of land, if clauses 4(c) and 4(d) are retained, has been wrongly determined. Assessment of rent of agricultural lands in a *khas mahal* is mainly based upon the prevailing rate or upon the several considerations mentioned in section 104A of the Bengal Tenancy Act. As there are a very large number of agricultural *khas mahal* tenants in this province, and as the rent of similar lands of a particular locality is known and as a decision about the settlement of rent of such land is not at all complex, the tenant has not been given the right to contest such an assessment of agricultural lands. But in regard to the assessment of non-agricultural lands, there is no prevailing rate, and various complicated questions of fact and law would arise, which are properly triable by a Civil Court; the principle of assessment of non-agricultural lands being altogether different from that of agricultural lands. On account of the complex nature of the questions that are likely to arise in the case of non-agricultural lands, it is just and proper that a tenant aggrieved by the rent settled by the Revenue-Officers, the fairness or otherwise of such rent should be determined by Judicial Officers, who are accustomed to sift evidence, to interpret documents and are conversant with the intricacies of Civil law. The complications involved in the determination of market value are not also inconsiderable. I cannot, therefore, endorse the curtailment of the rights of tenants on the pleas of convenience and quickness, specially when Government is the landlord and the Revenue-Officer the agent. In my opinion, a new sub-clause should be inserted in clause 13(3) to the effect that such a suit might be instituted on the grounds stated above by a tenant aggrieved by an entry and desirous of contesting the assessment on such grounds.

- (8) "Estimating Officer" means an officer appointed by the Local Government for a notified area or any part thereof to prepare under sub-section (1) of section 8 an estimate of the average increase in the outturn of the produce from agricultural lands;
- (9) "grade" means a grade of land in the list of grades drawn up by the Chief Estimating Officer under sub-rule (1) of rule 4;
- (10) "improvement" means an improvement that has resulted or is, in the opinion of the Local Government, likely to result from an improvement work as defined in the Act;

- (12) "section" means a section of the Act;
- (13) "selected area" means an area, outside a notified area, selected by a Chief Estimating Officer under sub-rule (1) of rule 4;

- (18) "zone" means a zone in the list of zones drawn up by the Chief Estimating Officer under sub-rule (1) of rule 7.

*Preparation of estimate of increased outturn (section 8).*

3. An Estimating Officer shall work under the control and supervision of the Chief Estimating Officer appointed for the notified area of which the charge of such Estimating Officer forms a part.

4. (1) The Chief Estimating Officer shall draw up a list of grades into which agricultural lands in the notified area, and, if he thinks fit, in any area that he may select outside it, shall be divided according to their soils.

(2) He shall assign to each such grade a number or numbers in a valuation scale according to his estimate of the relative productivity of its soil, on the assumption that all the grades enjoy the same rainfall.

5. (1) The Chief Estimating Officer shall draw up a list of sorts into which the lands in each grade in the notified area, and in any selected area, shall be classified.

(2) He shall assign to each sort in each grade a number or numbers in the valuation scale according to his estimate of its relative productivity, on the assumption that all the sorts enjoy the same rainfall as the grades under sub-rule (2) of rule 4.

(3) When the Chief Estimating Officer draws up a list of such sorts for any area where there has already been an improvement, he shall take account of those factors only that influenced productivity before such improvement.

6. In making an estimate of the relative productivity of any sort of land under rule 5 the Chief Estimating Officer may take into consideration (1) such factors as (a) the depth of the soil, its texture and its capacity for retaining moisture and (b) the extent to which the relation of land to adjoining lands influences its chances of receiving water, with or without fertilising matter in suspension, from higher lands or of its being adequately drained, and (2) any classification of agricultural lands that is customary in the area or any part of it.

7. (1) The Chief Estimating Officer may draw up a list of zones into which the notified area and any selected areas shall be divided according to any differences which in his opinion exist in their normal rainfall and which he considers to be such as materially to affect the average productivity of land in such zones.

(2) He shall assign to each zone a figure or figures by the application of which the number or numbers assigned in the valuation scale to any sort of land in any grade may be modified.

8. An Estimating Officer shall decide what grades and what sorts of agricultural lands occur in each village within his charge.

9. (1) The Chief Estimating Officer shall make provisional estimates, for each sort of land within each grade and in each zone in the notified area, of the average outturn of paddy in terms of grain (a) over a period of fifteen years or longer before the improvement, on the assumption that the standard of cultivation was no higher than might, in his opinion, have reasonably been expected from cultivators of ordinary skill in the area when cultivating such sort of land, and (b) after the improvement, on the assumption that full advantage has been or will be taken of any facilities for irrigation that have been or will be afforded by an improvement work and that in other respects the standard of cultivation has been or will be no lower than might, in his opinion, reasonably be expected from such cultivators.

(2) He shall make similar estimates regarding the outturn of paddy straw.

10. In preparing an estimate under clause (a) of sub-rule (1) of rule 9 of the average outturn the Chief Estimating Officer shall take into account any variations in the outturn from land of any grade or sort that have resulted from variations in the amount or distribution of the rainfall during the years covered by the estimate.

11. In preparing an estimate of the average outturn for any local area in which the outturn has been in any year materially reduced by any natural calamity, the Chief Estimating Officer shall exclude from consideration the data appertaining to that year unless, in his opinion, the improvement is likely to be a safeguard against the occurrence or recurrence of such a calamity in the notified area.

12. In preparing an estimate of the average outturn the Chief Estimating Officer may, by application of the valuation scale or otherwise, base an estimate of the outturn from land of any sort at any place within a notified or selected area, for any year or series of years, upon known or estimated figures for the outturn from land of the same or another sort in the same or another grade in the same or another zone in a notified or selected area.

13. In preparing an estimate of the average outturn a Chief Estimating Officer may take into account any factors which in his opinion are relevant and in particular—

- (i) any figures based on crop cutting experiments by any department of Government;
- (ii) any estimate or statement that he may find in any publication or record of Government regarding the outturn of any kind of crop from any kind of agricultural land at any place in a notified or selected area, whether before or after the improvement;
- (iii) any evidence as to the outturn from, or the relative value of, any kind of agricultural land at any place in a notified or selected area, that may be available from a kabuliat, lease, register, book of account, or other document or in a decree or order passed by a Civil or Revenue Court;
- (iv) statements or opinions written or verbal of experts or other persons who in his opinion have special knowledge;
- (v) any generally received opinion as to the relative productivity of land in different zones or of different grades or sorts.

*Publication of preliminary estimates and hearing of objections*  
[section 8(I)].

14. When a Chief Estimating Officer has made the provisional estimates under rule 9, each Estimating Officer in the notified area shall, by a notice published in the manner specified in rule 17, announce

(a) such of the provisional estimates as are relevant to conditions in his charge or any part thereof and (b) an estimate of the average increase in the outturn of paddy, in terms of grain and straw, respectively, from each sort of land within each grade in such charge.

15. A notice under rule 14 shall specify the area to which the notice relates, and shall fix a time and a place at which the Estimating Officer will receive and consider objections under sub-section (1) of section 8.

16. The time fixed under rule 15 for receiving and considering objections shall be not less than ten days after the date when the notice is published in the Collector's office.

17. A notice under rule 14 shall be published in the following manner:—

(a) copies shall be hung up in the offices of the Collector of the district and the District Judge and in the offices of every Subdivisional Officer, Munsif or Sub-Registrar within whose jurisdiction the notified area or any part thereof is situated; and

(b) the fact that such notice has been thus published shall be announced by beat of drum, or in such other manner as the Collector may direct, in such places in that area as the Collector may think fit.

18. At the time and the place fixed in the notice under rule 14 the Estimating Officer shall receive all objections under sub-section (1) of section 8 which may be presented to him.

19. Every objection under sub-section (1) of section 8 shall be made by means of a properly stamped petition.

20. The Estimating Officer shall not be bound to consider any objection under sub-section (1) of section 8 which is presented after the time fixed in the notice under rule 14.

21. (1) On the date fixed in the notice under rule 14 or on any subsequent date to which he may adjourn the proceedings the Estimating Officer shall hear arguments relating to the objections which have been received by him before the expiry of the time fixed in the notice under rule 14, and shall make a memorandum of any evidence which he thinks fit to take in connection with an objection.

(2) When an Estimating Officer has heard argument on any point raised in or in connection with any objection, it shall not be necessary for him to hear another argument on the same point or on a point which is, in his opinion, substantially of the same nature, in connection with any other objection that has been presented at the same place.

22. Arguments heard and evidence taken by an Estimating Officer under rule 21 shall be heard or taken in public.

23. (1) After considering the objections the Estimating Officer shall forward them and the memorandum of any evidence that he may have taken to the Chief Estimating Officer, with his remarks and with his estimates of the average increase in the outturn of paddy, in terms of grain and straw, respectively, from each sort of land within each grade in his charge.

(2) In making estimates of the average increase in the outturn the Estimating Officer shall follow the principles of the provisions of rules 9 to 13.

24. (1) The Chief Estimating Officer, after considering the objections and any recommendations made by the Estimating Officer and after such further inquiry, if any, as he considers necessary, shall forward the estimates received by him from the Estimating Officers to the Board of Revenue, for action under sub-section (2) of section 8, together with his remarks.

(2) At the time of forwarding a report under sub-section (2) of section 8 to the Local Government the Board of Revenue shall also forward the remarks of the Chief Estimating Officer referred to in sub-rule (1).

*Estimate of net increase in profits and of net value of estimated increase in outturn [section 10(3)].*

25. (1) The Chief Estimating Officer shall make an estimate of the average cost, before and after the improvement, of cultivating paddy on land of each sort within each grade in the notified area, on the assumption that it has been or will be cultivated, in accordance with any standards that are, or will be, in his opinion, reasonable for the cultivation of land of such sort, before or after the improvement, among cultivators of ordinary skill, by labourers paid at such rates as he considers to be prevalent or reasonable for the period for which he makes the estimate.

(2) When the Chief Estimating Officer makes an estimate of the cost of cultivation after the improvement, he shall assume that full advantage has been or will be taken of any facilities for irrigation that have been or will be afforded by an improvement work and shall take into account any saving in labour or material that may have been or is likely to be made possible by such improvement and any change in the standard of cultivation that is, in his opinion, likely to follow such improvement.

(3) The Chief Estimating Officer shall not include the improvement levy as part of the cost of cultivation.

(4) The Chief Estimating Officer shall make separate estimates for land of any sort that has been or may be irrigated by lift after the improvement.

(5) Rent paid for land shall be deemed to be part of the cost of cultivating such land, but the Chief Estimating Officer may base his estimate on the rates or rent generally paid by occupancy ryots for different sorts of land in different parts of the notified area.

26. The Chief Estimating Officer shall make, for each sort of land within the notified area, estimates of the average cost of harvesting and thrashing the paddy yielded by it before and after the improvement.

27. (1) The Chief Estimating Officer shall divide the notified area into tracts according to the relative advantages which in his opinion the cultivators within each tract enjoy as regards disposal of their produce, and, in so doing, he shall have regard to such factors as the proximity of markets, their nature and their accessibility.

(2) He shall fix for each such tract a figure representing the average cost of disposing of the produce in a market.

28. (1) The Chief Estimating Officer shall make for each sort of land within each grade and each zone in the notified area estimates of the gross value of the outturn before and after the improvement, by multiplying the estimated outturn of paddy, in grain and straw respectively, by the price fixed for it by the Local Government under section 9.

(2) He shall deduct from the estimates thus made of the gross value of the outturn of each sort of land in each tract before and after the improvement.

(a) the cost of cultivation as estimated by him under rule 25;

(b) the cost of harvesting and thrashing as estimated by him under rule 26; and

(c) the cost of disposing of the produce in a market as determined by him under rule 27 for such tract.

(3) The difference between the net estimates thus obtained for each such sort of land shall be his estimate of the net value of the estimated increase in the outturn of such sort.

(4) The Chief Estimating Officer shall draw up, in such manner as he may think fit, a list of classes of land on the basis of his estimate of the net value of the estimated increase in the outturn from each such sort of land, and shall assign to the same class, all those sorts for which he estimates the net value of the estimated increase in the outturn to be the same, whether they have been assigned to the same or different grades or to the same or different zones in the valuation scale.

(5) He shall forward to the Local Government the list of classes prepared under sub-rule (4) and the estimates made under sub-rules (1), (2) and (3).

*Persons deemed to be occupiers of land for the purposes of section 10(1).*

29. The following classes of persons shall be deemed to be occupiers of land for the purposes of sub-section (1) of section 10, in respect of all their agricultural land except that which is let, or sublet, by them to others or which has otherwise passed out of their *khas* possession:—

- (a) (i) proprietors,
- (ii) tenure-holders,
- (iii) *raiyats*,
- (iv) under-*raiyats*,
- (b) *bhagchasi* tenants,
- (c) service tenants,
- (d) *dakhalkars*, or squatters, who are in cultivating possession of land, and
- (e) any person to whom land has been transferred on a usufructuary mortgage.

*Explanation.*—The terms “proprietors,” “tenure-holders,” “*raiyats*” and “under-*raiyats*” have the same meanings as in the Bengal Tenancy Act, 1885.

*Proportion of improvement levy payable by bhagchasis [section 10(5).]*

30. In the Damodar Canal area—

- (1) a *bhagchasi* tenant shall be liable to pay a part of the improvement levy that bears the same proportion to the total improvement levy assessed on the land as the share of the produce which he is liable to deliver to his landlord bears to the total produce: and his landlord shall be liable to pay the remainder of the improvement levy;
- (2) any other *bhagchasi* shall not be liable to pay any part of the improvement levy.

*Preparation of Assessment List (section 13).*

31. The Chief Estimating Officer shall decide whether any special advantages or disadvantages shall be recognised in a notified area as affecting materially the productive capacity of individual plots of any sort and shall assign to each such recognised advantage or disadvantage a figure or figures by the application of which the assignment of a plot to a class may be modified.

32. (1) When an improvement work includes means of irrigation, the Chief Estimating Officer shall classify by kinds the facilities for irrigation which existed, or exist, in a notified area before such improvement work, according to the degree to which they enabled, or enable, land to be irrigated for the cultivation of paddy,

(A) in years of normal rainfall (a) before or during the transplantation season and (b) during the season of flowering and grain formation, and

(B) in years of drought throughout the cultivation season;

and shall assign to each kind a figure or figures by the application of which the assignment, to a class, of land of any sort, enjoying irrigation of that kind, may be modified.

33. (1) An Estimating Officer shall decide to what grade and to what sort each plot in his charge belongs, and shall determine to what class it shall be assigned.

(2) If he is satisfied that a special advantage or disadvantage recognised under rule 31 by the Chief Estimating Officer attaches to an individual plot or that it enjoys facilities for irrigation of any kind classified under rule 32, he shall take into account such advantage, disadvantage or facility when he determines to what class such plot shall be assigned.

(3) Any decision by an Estimating Officer under this rule shall be subject to modification by the Collector.

34. The Estimating Officer shall forward to the Collector a note of his decisions under rule 33, and the Collector, after accepting or modifying such decisions, shall determine at what rate, as declared by the Local Government under sub-section (1) of section 10, the improvement levy shall be imposed on each plot.

35. (1) There shall be a separate assessment list, in form A, annexed to these rules in respect of the agricultural lands in each mauza.

(2) An assessment list shall be in separate parts in respect of persons liable to pay improvement levy (a) annually and (b) otherwise.

(4) Fractions of annas shall be neglected when entries are made in column 8.

(5) A separate entry shall be made in columns 5, 6 and 7 in respect of any land held by a *bhagchasi* tenant.

(6) Subject to sub-rule (5), a separate entry shall be made in columns 5, 6 and 7, for each assessee, of the total area of all lands which are assigned to the same class.

36. (1) The Collector shall issue a notice calling upon persons who may wish to claim to be assessed as *bhagchasi* tenants or landlords of *bhagchasis* to apply to him by a fixed date.

(2) No person shall be assessed as a *bhagchasi* tenant unless he is proved to be such, to the satisfaction of the Collector, by the production of an entry in a record-of-rights published after the 21st February, 1929, or of a document in which his landlord expressly admits him to be a tenant or of an order of the Civil Court holding him to be such.

37. An assessment list shall be signed by the Collector, or by an officer authorised by him generally or specially, and published in the manner specified in rule 17 for publication of a notice under rule 14.

#### *Notice of demand under section 14.*

38. (1) There shall be a separate notice of demand under section 14 in respect of the land held by the assessee in each mauza.

(2) Such notice shall show, in respect of such land, the total areas assessed in each class.

(3) Such notice shall show the area of any land occupied by the assessee as a *bhagchasi* tenant or a *bhagchasi* landlord and the name of the *bhagchasi* landlord or the *bhagchasi* tenant concerned.

(4) Such notice shall be in form B annexed to these rules and may be signed by any officer authorised by the Collector.

39. A notice of demand under section 14 may be served in any of the following ways:—

(a) a copy may be tendered or delivered to the assessee by or in the presence of the officer who has signed it and such officer shall record on the original notice a note that this has been done, or

(b) a copy may be served in the manner laid down in rule 179 of the Bengal Practice and Procedure Manual.

#### *Modification of assessment list under section 15.*

40. The Collector may by general or special order appoint an officer or officers to receive or inquire into representations made under sub-section (1) of section 15 by persons whose names are included in an assessment list.

41. (1) An officer appointed under rule 40 may, by a written order giving the reason, reject summarily any representation made under sub-section (1) of section 15.

(2) Such order shall be subject to confirmation by the Collector.

42. A claim by any person that his name should be substituted for or added to the name of any assessee in respect of any assessment shall be rejected if such assessee does not admit the claim to be justified.

43. An officer appointed under rule 40 may cause an inquiry into a representation to be made by any other officer appointed under that rule who is subordinate to him.

44. (1) When an officer appointed under rule 40 has inquired into a representation he shall submit a report, with his recommendations, to the Collector who shall pass orders thereon.

(2) Any modification which the Collector orders to be made in an assessment list shall be initialled and dated by him or by an officer authorised generally or specially by him.

45. The republication under sub-section (1) of section 15 of the assessment list shall be made in the manner specified in clause (a) of rule 17 for publication of a notice under rule 14.

46. A revised notice of demand shall be in form B annexed to these rules but shall be marked "modified under section 15."

*Addition to or alteration in assessment list under section 16.*

47. If, during a period fixed by the Local Government under section 9 and after the publication of an assessment list under section 13, the Collector is satisfied that any entry in such list should be altered owing to any error that has been detected or owing to a change of occupier by succession, bequest, sale, mortgage, gift or lease or by order of a Court or in any other manner or that any land, in respect of which an improvement levy has not been imposed, has been brought under, or become fit for, cultivation, he may after such inquiry as he thinks fit alter such entry or add to the list the name of the person liable to pay the improvement levy in respect of such land at the rate determined by the Collector.

48. Any alteration or addition made under rule 47 or in accordance with sub-section (2) of section 16 shall be initialled and dated in the manner specified in sub-section (2) of rule 44.

*Copies of assessment list (section 19).*

49. Copies of entries in an assessment list shall be made available in the manner laid down in rules 286-297B of the Bengal Records Manual, 1917, on payment of the fees prescribed therein.

*Abatement and Remission (section 20).*

50. If the Executive Engineer in charge of any canal which is an improvement work is of opinion that the outturn is deficient over any considerable area owing to a failure to supply water from such canal in sufficient quantity or at the proper time, he shall make a report to the Collector.

51. When the Collector receives a report under rule 50 or has reason otherwise to believe that the outturn is deficient over any considerable area, he shall make or cause to be made a local enquiry as to the extent of any deficiency.

52. (1) Any person, who considers that the outturn of any land, in respect of which he is liable to pay improvement levy, is so deficient as to justify abatement or remission of the levy, may apply by a petition to the Collector for such abatement or remission.

(2) If the Collector does not, for a reason which he shall record in writing, summarily dismiss such petition, he shall make or cause to be made a local inquiry as to the extent of any deficiency.

53. No remission or abatement shall ordinarily be granted as a result of a petition under rule 52 if the Collector is satisfied that the paddy on the land concerned was reaped before, or within fifteen days after, the presentation of the petition, unless an inquiry under rule 51 or rule 52, in respect of the outturn of such land has been completed before the crop was cut.

54. (1) If as a result of an inquiry made under rule 51 or rule 52 the Collector considers that there has been or will be any serious deficiency in the outturn of any land, he shall decide what has been or is likely to be the actual outturn of such land per acre.

(2) If it appears that such deficiency in outturn was due to any neglect on the part of the occupier or to his failure to cultivate such land in accordance with the standard, which in the opinion of the Chief Estimating Officer under rule 25, is reasonable for the cultivation of land of the sort to which such land belongs, the Collector shall decide summarily what would have been the probable outturn if the assessee had not been neglectful or had cultivated the land in accordance with such standard.

*Explanation.*—Failure to take full advantage of any facilities for irrigation that have been afforded by an improvement work shall be deemed to be neglect.

55. When the Collector has decided the actual outturn or the probable outturn under rule 54, he shall calculate the figure by which such outturn per acre exceeds or falls short of the estimate, as approved by the Local Government, of the average outturn, before the improvement, of land of that class. If the figure exceeds such estimate the Collector shall determine, as far as may be in the manner laid down in rules 28 and 33, a hypothetical rate of improvement levy (a) which might have been imposed on the land in question if the figure thus calculated had been substituted for the estimate, accepted by the Local Government under sub-section (2) of section 8, of the average increase in outturn, and (b) as regards the Damodar Canal area, which might have been realised if sub-section (6) of section 10 had not been enacted.

56. (1) If the hypothetical rate of improvement levy determined under rule 55 is higher than the rate entered in column 7 of the assessment list for the land in question, the Collector shall not allow any abatement or remission.

(2) If such hypothetical rate is lower than the rate entered in column 7 of the assessment list for the land in question, the Collector shall, subject to rule 57, allow a remission of the improvement levy at the rate of one anna per acre, calculated to the nearest anna, for every complete anna by which such hypothetical rate falls short of the rate entered in column 7 of the assessment list.

(3) If the outturn per acre, as decided by the Collector under rule 54, falls short of the estimate, as approved by the Local Government, of the average outturn, before the improvement, of land of that class, the Collector shall, subject to rule 57, allow total remission of the improvement levy.

57. (1) The Collector may allow remissions in any year up to a total of 5 *per cent.* of the demand for a notified area for that year.

(2) Subject to confirmation by the Commissioner he may allow further remissions up to 10 *per cent.* of such demand in the year.

(3) If the Collector considers it probable that remissions in excess of a total of 15 *per cent.* of such demand in a year will be necessary he shall report the facts to the Local Government through the Commissioner, and may allow such further remissions as may be approved by the Local Government.

58. Subject to rules 59 and 60 the Collector may allow an abatement of improvement levy in respect of any land if he is satisfied, after inquiry, that the position assigned to such land in the valuation scale is higher than is justified.

59. If the Collector considers that an abatement should be allowed because in his opinion there is an error in the valuation scale or in the estimate accepted by the Local Government under sub-section (2) of section 8, he shall submit a report to the Commissioner, who shall, if he thinks fit, refer it to the Local Government for orders, and, without an order from the Local Government, the Collector shall not allow any abatement.

60. (1) The Collector may allow abatements in any year up to a total of 2½ *per cent.* of the demand for a notified area for that year.

(2) Subject to confirmation by the Commissioner he may allow further abatements up to 5 *per cent.* of such demand in the year.

(3) If the Collector considers it probable that abatements in excess of a total of 7½ *per cent.* of such demand in a year will be necessary he shall report the facts to the Local Government through the Commissioner, and may allow such further abatements as may be approved by the Local Government.

61. Notice shall be given in the area concerned, as soon as possible, of—

(a) any local inquiry to be made under rule 51, or

(b) any abatements or remissions, except rebates under rule 65, that have been allowed over any considerable area.

Such notice shall be announced by beat of drum or in such other manner as the Collector may direct, in such places in the area as the Collector may think fit.

62. When an abatement or remission, other than a rebate under rule 65, has been allowed, a notice, giving details of such abatement or remission, shall be served on the assessee concerned in the manner specified in rule 39, for service of a notice of demand.

63. The Collector shall not, without the prior sanction of the Local Government, grant any abatement or remission on the ground that he considers that the price of paddy, whether grain or straw, is less than that fixed by the Local Government under section 9.

*Manner of collection and date of payment (section 21).*

64. (1) The Collector may divide a notified area into circles for the purpose of the collection of improvement levy.

(2) He may collect the improvement levy through officers appointed for the purpose.

(3) An assessee shall pay the improvement levy, either directly or by money order, to an officer thus appointed within the area or circle where the land in respect of which the assessment is made is situated.

(4) If the assessee pays the improvement levy by money order he shall quote therein the number and date of the demand notice in respect of which the payment is made.

65. In the Damodar Canal area a rebate of half an anna in the rupee, calculated to the nearest anna, shall be allowed on the total amount payable under any notice of demand if such amount is paid in full at any time earlier than fifteen days before the date specified in rule 66.

66. (1) The date on which an assessee shall become liable under sub-section (2) of section 21 to pay interest from the date fixed in the notice of demand under rule 38 shall be for the Damodar Canal area 15th February.

(2) The rate of interest payable under the said section shall be six and a quarter *per cent*.

*Manner of making refunds (section 22).*

67. (1) If the person to whom a refund is due under section 22 applies for payment in cash, the Collector shall pay him the amount through the Treasury. If the person who has so applied does not appear to receive payment or if the person to whom such a refund is due applies for payment by money-order, the Collector shall pay him the amount by money-order after deducting the cost of such transmission.

(2) If the person to whom such a refund is due does not apply for payment the Collector may make the refund—

(a) by causing the amount to be shown as advance payment against any demand already due or likely to be due, from such person under the Act, or

(b) by money-order after deducting the cost of such transmission.

*Right to supply of water (section 29).*

68. In the Damodar Canal area the period within which no person shall have a right to a supply of water under the Bengal Irrigation Act, 1876, shall be from the 1st November to the 30th June.

## FORM IV.

## ABSTRACT OF THE PAYMENT OF WAGES ACT, 1936, AND THE RULES MADE THEREUNDER.

*Whom the Act affects.*

1. The Act applies to the payment of wages to persons in this factory receiving less than Rs. 200 a month.
2. No employed person can give up by contract or agreement his rights under the Act.

*Definition of wages.*

3. "Wages" means all remuneration payable to an employed person on the fulfilment of his contract of employment.

It includes bonus and any sum payable for want of a proper notice of discharge.

It excludes :—

- (a) the value of house-accommodation, supply of light, water, medical attendance, or other amenity or of any service excluded by the Governor General in Council or the Local Government ;
- (b) the employer's contribution to a pension or provident fund ;
- (c) travelling allowance or concession or other special expenses entailed by the employment ;
- (d) any gratuity payable on discharge.

*Responsibility for and method of payment.*

4. The manager of the factory is responsible for the payment under the Act of wages to persons employed under him, and any contractor employing persons is responsible for payment to the persons he employs.

5. Wage-periods shall be fixed for the payment of wages at intervals not exceeding one month.

6. Wages shall be paid on a working day within 7 days of the end of the wage-period (or within 10 days if 1,000 or more persons are employed).

The wages of a person discharged shall be paid not later than the second working day after his discharge.

7. Payments in kind are prohibited.

*Fines and deductions.*

8. No deductions shall be made from wages except those authorised under the Act (see paragraphs 9—15 below).

9. (1) Fines can be imposed only for such acts and omissions as the employer may, with the previous approval of the Chief Inspector of Factories, specify by a notice displayed at or near the main entrance of the factory and after giving the employed person an opportunity for explanation.

## (2) Fines—

- (a) shall not exceed half-an-anna in the rupee ;
- (b) shall not be recovered by instalments, or later than sixty days of the date of imposition ;
- (c) shall be recorded in a register and applied to such purposes beneficial to the employed persons as approved by the Chief Inspector of Factories ;
- (d) shall not be imposed on a child.

10. (a) Deductions for absence from duty can be made only on account of the absence of the employed person at times when he should be working, and such deduction must not exceed an amount which is in the same proportion to his wages for the wage-period, as the time he was absent in that period is to the total time he should have been at work.

(b) If ten or more employed persons, acting in concert, absent themselves without reasonable cause and without due notice, the deduction for absence can include wages for eight days in lieu of notice, but :—

- (1) no deduction for breaking a contract can be made from a person under 15 or a woman,
- (2) there must be a provision in writing which forms part of the contract of employment, requiring that a specific period of notice of intention to cease work not exceeding 15 days or the period of notice which the employer has to give to discharge a worker, must be given to the employer and that wages may be deducted in lieu of such notice.
- (3) The above provision must be displayed at or near the main entrance of the factory.
- (4) No deduction of this nature can be made until a notice that this deduction is to be made has been posted at or near the main entrance of the factory.

- (5) No deduction must exceed the wages of the employed person for the period by which the notice he gives of leaving employment, is less than the notice he should give under his contract.

11. Deductions can be made for damage to or loss of goods expressly entrusted to an employed person or for loss of money for which he is required to account, where such damage or loss is due to his neglect or default.

Such deduction cannot exceed the amount of the damage or loss caused and can be made only after giving the employed person an opportunity for explanation.

12. Deductions can be made, equivalent to the value thereof, for house accommodation, amenities, or services (other than tools and raw material) supplied by the employer, provided these are accepted by the employed person as a part of the terms of his employment and have in the case of amenities and services been authorised by order of Government.

13. (a) Deductions can be made for the recovery of advances, or for adjustment of overpayment of wages.

(b) Advances made before the employment began can only be recovered from the first payment of wages for a complete wage-period but no recovery can be made of advances given for travelling expenses before employment began.

(c) Advances of unearned wages can be made at the paymaster's discretion during employment.

14. Deductions can be made for subscription to and for repayment of advances from any recognised provident fund.

15. Deductions can be made for payments to co-operative societies approved by the Local Government or to the postal insurance, subject to any conditions imposed by the Local Government.

#### *Inspections.*

16. An Inspector can enter on any premises, and can exercise powers of inspection (including examination of documents and taking of evidence) as he may deem necessary for carrying out the purposes of the Act.

#### *Complaints of deductions or delays.*

17. (1) Where irregular deductions are made from wages, or delays in payment take place, an employed person can make an application in the prescribed form within 6 months to the Authority appointed by the Local Government for the purpose. An application delayed beyond this period may be rejected unless sufficient cause for the delay is shown.

Provided that no licence shall be required for the storage of carbide of calcium—

(i) in any quantity not exceeding five pounds if it is kept in prescribed receptacles each containing not more than one pound;

(a) the receptacles shall be stored in a dry and well ventilated place;

(b) due precautions shall be taken to prevent unauthorized persons from having access to the carbide;

(c) notice shall be given of such storage to the District Authority and free access shall be afforded to any duly authorized person to inspect the premises where the carbide is stored and the generator, if any, is situated;

(d) where a fixed generator is used on the premises detailed instructions as to the care and use of the generator shall be kept constantly posted up in a place where they can conveniently be referred to by the generator attendant.

20. *Storage buildings.*—(1) Carbide of calcium shall be stored—

(a) if in quantities aggregating not more than 500 pounds—in a suitable uninhabited building at least 20 feet away from any other premises: provided that quantities not exceeding 250 pounds may be stored in a place connected with a shop at a distance not less than 10 feet from any other premises;

If deep water is not available, the wet carbide of calcium shall be spread out in the open in an isolated position, and all precautions shall be taken to prevent lights being brought near until the material has given off all its gas.

NOTE.—The fact of carbide of calcium having become wet will be indicated by the outward appearance of the drum, and probably by a disagreeable odour, showing a leakage of gas.

25. *Precautions by vendor.*—(1) Every vendor of carbide of calcium, delivering any quantity exceeding half a pound to any person, shall deliver it to him in a prescribed receptacle.

(2) No vendor shall open more than one receptacle at a time for the purpose of delivering carbide of calcium.

## CHAPTER IV.

### Manufacture of Acetylene Gas.

27. *Application of Chapter.*—(1) The rules in this Chapter shall be observed by every person holding a licence for the storage of carbide of calcium granted under these rules who uses such carbide for the manufacture of acetylene gas.

(2) In this Chapter, apparatus means any appliance for the manufacture of acetylene gas, including all generators and gas-holders.

28. *Construction of apparatus.*—(1) The apparatus shall be so constructed that lime sludge cannot gain access to any pipes intended for the passage of gas or the circulation of water.

(2) The use of glass in water gauges, sight boxes, etc., shall be avoided, but where glass is absolutely necessary as part of the apparatus it shall be effectively protected against fracture.

(3) The apparatus shall be so constructed that it is not possible, even by incorrect manipulation of cocks, to seal the generating chamber hermetically.

(4) The air space in a generator shall be as small as is consistent with the proper working of the apparatus.

(5) No metal containing more than 80 per cent. of copper shall be present in any portion of the apparatus including the devices for preventing the passage of oxygen into the acetylene supply pipes, the pipe lines and the other fittings, but excluding the nozzles of the blow pipes.

(6) The various parts of the apparatus shall be of adequate strength to withstand any pressures that may be generated therein.

(7) The size of the pipes carrying the gas shall be proportioned to the maximum rate of generation, so that undue back pressure from throttling may not occur.

29. *Efficiency of apparatus.*—The apparatus shall have an efficiency of at least 90 per cent.

30. *Temperature of apparatus.*—The temperature of any part of the apparatus, when working, shall not exceed 180°F.

NOTE.—The temperature may be ascertained by placing short lengths of wire, drawn from fusible metal of a suitable melting point in those parts of the apparatus in which heat is liable to be generated.

31. *Pressure.*—(1) The apparatus used shall not be made to work at a pressure exceeding 60 inches water column:

Provided that if it be shown to the satisfaction of the licensing authority that a higher pressure is necessary in any generating apparatus and that such higher pressure may be used without danger, the licensing authority may allow the use of higher pressure up to a maximum of 250 inches water column on the condition that the apparatus is fitted with suitable safety devices. A generator operating at a higher pressure than 60 inches water column shall have clearly marked on it the water column at which it works.

(2) In the use of the apparatus, regard shall be had to the danger of stoppage of passage of the gas and a consequent increase of pressure.

32. *Precautions against escape of gas.*—(1) Escape of gas from the apparatus shall be carefully guarded against.

(2) Gasholders shall be fitted with blow off pipes carried up to a suitable point in the open air.

33. *Decomposition of carbide.*—(1) The carbide shall be completely decomposed in the apparatus, so that the lime sludge discharged therefrom shall not be capable of generating more gas.

(2) The apparatus shall give no tarry or other heavy condensation products from the decomposition of the carbide.

34. *Residue.*—(1) An open tank shall be provided in the open air, for the reception of all residue from the carbide; and such residue shall remain for at least ten hours in not less than four times its bulk of water in such tank.

(2) Precautions shall be adopted for preventing any lime sludge from being discharged into the drains.

35. *Attendants.*—(1) No person shall have charge of an apparatus until he has been properly instructed in its management.

(2) A label or printed card giving fully detailed instructions as to the use of the apparatus shall be exhibited on or in close proximity to the apparatus. Such instructions shall not presuppose any expert knowledge on the part of the attendant.

## RESOLUTION.

New Delhi, the 29th October 1936.

No. M.-955.—The Government of India have, for some time, had under consideration the question of devising measures for conserving the coal assets of this country by improving the methods of extraction and preventing avoidable waste. The serious extension of fires in the main coalfields has added urgency to this problem and by increasing the danger to life brought into prominence the necessity of affording greater protection to persons employed in mines.

2. Certain emergency steps have been taken with the concurrence of the Legislature for the protection of the miners, but the Government of India have reasons to think that these are not likely to prove adequate in future years. A very large amount of coal is now standing in pillars and its extraction must necessarily involve a larger degree of danger than is ordinarily attendant on the driving of galleries by which the bulk of the coal has been extracted in the past. It is also probable that losses of coal due to fires and collapses will in the future be more extensive than they have been in the past unless proper steps are taken. The Government of India have accordingly decided, as already announced in the Legislative Assembly, to appoint a Committee of experts to inquire into the methods of extracting coal underground and to report on the measures which should be taken—

(i) to secure the safety of those employed on this work, and

(ii) to prevent avoidable waste of coal.

In connection with part (i) the Committee are asked to consider specially—

(a) the dangers arising from underground fires;

(b) the dangers arising from collapses of working; and

(c) the suitability of the explosives in use, and of the methods of using and storing them.

In connection with part (ii) the Committee are asked to consider specially—

(a) the control that should be exercised over mining methods to ensure that a substantial proportion of the coal is not rendered incapable of extraction;

(b) the extent to which it is desirable and practicable to enforce the partial or complete filling of the space from which coal is removed by incombustible material; and

(c) the manner in which the cost of any action that may be recommended should be met.

3. The Committee will be constituted as follows:—

*Chairman.*

Mr. L. B. Burrows, C.B.E., Commissioner, Burdwan Division.

*Members.*

Sir Jehangir Cooverjee Coyajee, Kt., I.E.S. (retired), late Professor of Political Economy and Philosophy, Andhra University.

Mr. J. Mackie, Agent, Eastern Coal Company, Limited.

Mr. H. K. Nag, Agent, Chasnala Coal Company.

Mr. N. Barraclough, Inspector of Mines.

Dr. M. S. Krishnan, A.R.C.S., D.I.C., Ph.D., Geologist, Geological Survey of India.

*Secretary.*

Mr. M. Ikramullah, I.C.S.

The inquiry of the Committee will be limited to the coalfields in Bengal, Bihar and the Central Provinces and its headquarters will be in Calcutta. It is expected to assemble about the end of November 1936.

S. N. Roy,

## STATEMENT OF OBJECTS AND REASONS.

India along with Burma is now treated as one producing country for the purpose of the International Agreement relating to the tea control scheme, which will remain in force till the 31st March, 1938. The Indian Tea Control Act, 1933, which was passed to give effect to this scheme, sets up one Licensing Committee for the whole of British India, including Burma, and restricts the total annual exports of tea from British India including Burma to the amount of the Indian Overseas Export Allotment for the year. But with effect from the date of separation of Burma from India, it will be necessary to have separate Licensing authorities and separate overseas export allotments for British India and Burma, on the same lines as are already provided in the case of the rubber control scheme. The present Bill is designed to give effect to that object.

## GOVERNMENT OF INDIA.

## Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 21st September, 1936:—

L. A. BILL No. 41 of 1936.

*A Bill further to amend the Indian Lac Cess Act, 1930, for a certain purpose.*

WHEREAS it is expedient further to amend the Indian Lac Cess Act, 1930, for the purpose hereinafter appearing; It is hereby enacted as follows:— XXIV of 1930.

Short title.

1. This Act may be called the Indian Lac Cess (Second Amendment) Act, 1936.

Amendment of section 4, Act XXIV of 1930.

2. In section 4 of the Indian Lac Cess Act, 1930, for the words "Bihar and Orissa", where they occur in clause (v) of sub-section (4) and in clauses (ii) and (v) of sub-section (5), the word "Bihar" shall be substituted. XXIV of 1930.

## STATEMENT OF OBJECTS AND REASONS.

Clause (v) of sub-section (4) of section 4 of the Indian Lac Cess Act, 1930, as amended by the Indian Lac Cess (Amendment) Act, 1936, provides for the nomination to the Governing Body of the Indian Lac Cess Committee of two members representing the cultivators of lac to be nominated by the Government of "Bihar and Orissa". At the time when the amending Bill was introduced in the last session of the Legislative Assembly the new province of Orissa had not been constituted; but it was the intention that both members would be nominated from what is now the province of Bihar. In reply to an enquiry whether the cultivation of lac in Orissa is considered to be of sufficient importance to justify a representative from that province the Government of Orissa have agreed to the appointment of both members from Bihar for the present. An amendment of the Act is proposed for the purpose of substituting "Bihar" for "Bihar and Orissa".

2. In addition to the amendment referred to above it is also proposed to amend clauses (ii) and (v) of sub-section (5) of section 4 of the Act as it was not intended that the Government of Orissa should be represented on the Advisory Board of the Indian Lac Cess Committee.

*Calcutta, the 12th November 1936.*

RESOLUTION—No. 15579 L.R.

Read—

The Report of the Board of Revenue on the Land Revenue Administration of the Presidency for the year 1935-36.

During the year under report, except in the Dacca and Chittagong Divisions, weather conditions were most unfavourable to agriculture. There was an almost complete failure of crops in wide tracts of certain West Bengal districts. The situation was aggravated by exceptionally heavy local floods in August and finally by a complete absence of rain from September onwards. It was evident that scarcity and possibly famine would result. Prompt measures were taken to meet the situation by opening test relief works and by granting agricultural loans and gratuitous relief. Nine lakhs of rupees were distributed in agricultural loans and a sum of Rs. 47,262 was also allotted for gratuitous and charitable relief. As scarcity conditions were likely to extend over most of West Bengal an additional Commissioner was appointed in January 1936 to control and supervise relief operations.

Even in Eastern and Northern Bengal, where conditions were distinctly better, there were few showers in February and March and the sowing of jute and *aus* paddy was delayed. In Rangpur tobacco was damaged by a hail-storm, which also destroyed the crop over an area of 4 square miles in the Falakata tahsil in Jalpaiguri. In Malda the floods of August damaged the standing crops while the second rise in the Ganges and Mahananda in September partly destroyed the *Kalai* crop. The out-turn of crops was fair in the Chittagong Division.

The material condition of the people improved somewhat in Eastern Bengal but deteriorated in Western Bengal. As a result of a vigorously organised propaganda to reduce the area under jute there was a rise in the price of the raw commodity though the greatest increase occurred at a time when the cultivators had already sold most of their stock. The increased cultivation of sugarcane caused a slump in its price. Owing to prolonged economic depression cultivators had no reserve out of which to meet the demands for rent and payment of interest on their debts. In Western and Northern Bengal especially many zamindars found themselves hard put to it to pay their Government dues. Rural banks and private money-lenders were also hampered in their activities.

The wages of both skilled and unskilled labour showed a tendency to fall. The landless middle class people with fixed incomes were, on the whole, in a slightly better position, but unemployment among the educated and semi-educated classes continued to be a serious problem. The economic condition of the people improved generally in districts which were not affected by weather conditions as in the Duars, in Tippera and Noakhali and in almost all the districts of the Dacca Division. One reassuring feature, worthy of mention, is that there is reported to be very little increase in the indebtedness of cultivators. This appears to be due in part to inability on the part of the debtors to incur fresh debts and also to an increasing desire to reduce existing debts. Attempts are also being made by them to increase their income by the cultivation of substitute crops and in other ways. The Debt Conciliation Boards which were at work all over the Chandpur subdivision and part of the Sadar subdivision in Tippera succeeded in many cases in effecting amicable and considerable reduction in the debts and satisfactory settlement between creditors and debtors.

2. The current demand of land revenue was Rs. 3,12,00,557, which showed an increase of Rs. 2,57,305 over that of the previous year, and collections were 73.54 per cent. of the total and 101.16 per cent. of the current demand. The fact that there were only 1,577 sales as against 25,262 defaults indicated the leniency with which the sale law was administered.

3. In comparison with the previous year, the cost of management of Government estates increased by Rs. 1,03,530, the percentage of cost on current demand being 9·5 against 8·5 in the previous year. A sum of Rs. 1,80,009 representing 2·5 per cent. of the current demand was spent on agricultural, sanitary and miscellaneous improvements, while a sum of Rs. 1,51,023 representing 1½ per cent. on collections from Government estates was made over to the district boards of the province for the development of roads and communications in or leading to Government estates.

4. Agricultural demonstrations were carried out in the districts of Jessore, Jalpaiguri, Bogra, Malda and Darjeeling and in the several districts of the Chittagong Division. In furtherance of the scheme to encourage *Bhadralok* youths to take to agriculture as a means of reducing unemployment, lands were allotted to the *sixth* batch of *Bhadralok* youths, on the completion of their training on the Faridpur Agricultural farm. In the 24-Parganas 100 bighas of land were settled with *Bhadralok* agriculturists. In Chittagong 76·78 acres of land has been settled with a graduate *Bhadralok*. In Malda about 180 bighas of land was settled with one Muhammadan graduate.

The number of schools and of pupils attending them in Government estates increased by 144 and 13,880 respectively during the year under review.

5. The year under report was the twenty-ninth year of the colonisation scheme of the Bakarganj Sunderbans. In the 24-Parganas Sunderbans (colonisation of which was in its twenty-first year) no new area was taken up for reclamation. The total sum advanced by Government for reclamation in the 24-Parganas and Bakarganj Sunderbans and the total income derived from these areas up to the end of the year under report were Rs. 32,54,808 and Rs. 46,04,118, respectively.

6. The general health of the people in the Bakarganj Sunderbans area was good; there was no material improvement, however, in their economic condition. In the 24-Parganas Sunderbans the health of the colonists was better than in the previous year. The outturn of crop was however poor due to adverse weather conditions.

7. Taking the province as a whole relations between private landlords and tenants were on the whole satisfactory, while in Government estates the relations between the khas mahal tenants and the Government tahsildari establishment continued to be satisfactory.

8. Thanks of the Governor in Council are due to the Board of Revenue for the efficient administration of the branches of work under the Board.

By order of the Governor in Council,

J. B. KINDERSLEY,

**Bills introduced in the Bengal Legislative Council, Reports of Select Committees presented or to be presented to that Council, and Bills published before introduction in that Council.**

**BENGAL LEGISLATIVE COUNCIL  
DEPARTMENT.**

### NOTIFICATION.

No. 2706L.C.—18th November, 1936.—The following report of the Select Committee on the Presidency-Towns Insolvency (Bengal Amendment) Bill, 1936, with the Bill embodying amendments recommended by the Committee, is hereby published for general information.

**Report of the Select Committee on the Presidency-Towns Insolvency  
(Bengal Amendment) Bill, 1936.**

We, the members of the Select Committee of the Bengal Legislative Council to which the Presidency-Towns Insolvency (Bengal Amendment) Bill, 1936, was referred by a motion carried in the Bengal Legislative Council on the 9th November, 1936, have the honour to submit this our Report with the Bill embodying amendments recommended by us annexed. All matter recommended to be omitted by the Select Committee has been printed in *italics* and enclosed in square brackets and all new matter recommended to be inserted has been underlined.

2. The Bill was published in English before introduction in the *Calcutta Gazette* of the 22nd October, 1936.

3. We do not consider that the Bill has been so altered by our recommendations as to require republication.

4. The Committee met on the 10th November, 1936, and concluded its sitting on the same day.

5. The amendments recommended by us are as follows :—

**Clause 3.**—Sub-clause (c) has been omitted as we consider that it is advisable to retain the reference to “security” in section 77 (2). It is not the intention that the official assignee should no longer be required to furnish security. Although provision requiring such security could be included in the rules regulating his conditions of service, it seems preferable that the statutory provision for the furnishing of such security should remain, especially as its omission might give rise to some doubt as to what is actually the intention.

**Clause 5.**—We have added sub-section (3) in order to make it clear that the liability imposed on the Local Government by sub-section (2) to pay sums in respect of misfeasance, neglect or omission will not operate as a bar to the recovery of any such sums personally from the official assignee who was responsible.

**Clause 7.**—Clause 7 of the Bill provided for the omission of section 84 of the Act. Although similar provisions would be applicable to the official assignee as a Government servant or could be included in his conditions of service, the direct statutory provision is, in our opinion, preferable. We have therefore altered this clause so as to retain section 84.

**Clause 9.**—Sub-clause (2) (cc) is consequential on the change made in clause 3.

## Minute of dissent by Mr. Narendra Kumar Basu, M.L.C.

I am sorry I cannot agree to the Report.

The principal objects of the Bill are—

- (1) to appoint a salaried officer as Official Assignee,
- (2) to have the appointment made by the Local Government,
- (3) to divide the control of the Official Assignee's work between the Local Government and the High Court, and
- (4) to transfer the unclaimed Dividend Funds and the Interest Funds to the coffers of the Local Government.

I disagree to all these proposals, and I proceed to give my reasons—

(1) **Appointment of a salaried officer.**—The Bill is expressly based upon the Report of the High Court Retrenchment Committee of 1923, but the circumstances have widely changed since then. About that time the commission drawn by the Official Assignee (every pice of which it must be remembered, has to be earned by work done) was very high, on account of the post-war financial crisis. The figures given in the said Report were—

1918	..	..	..	..	..	38,794
1919	..	..	..	..	..	38,650
1920	..	..	..	..	..	51,970
1921	..	..	..	..	..	50,200
1922	..	..	..	..	..	97,600

This last figure in particular drew the attention of the Committee and has presumably been the basis of all discussion since then by Government officers as well as by other Barristers. But it is forgotten that that figure was and is nowhere near the average. For the last few years the commission earned by this officer has been nowhere near that figure. The figures for the last few years are—

1932	..	..	..	..	..	28,861
1933	..	..	..	..	..	25,935
1934	..	..	..	..	..	32,525
1935	..	..	..	..	..	13,719
1936 (up to October)	..	..	..	..	..	6,430

that is an average of Rs. 1,853 per mensem much below the *minimum* salary recommended by the Committee.

I do not think moreover that a salaried officer of Government working during fixed office hours and having no incentive for the better realisation of assets of insolvent's estates, would be more suitable than one who has an interest in better returns.

(2) **Appointment by the Local Government.**—The present law is that the Official Assignee who has both Judicial and quasi-Commercial functions to discharge, is appointed by the Chief Justice. It is proposed by the Bill to vest the appointment in the Local Government "after consultation with and with the concurrence of the Chief Justice."

What is the reason for this? The Official Assignee has to do a lot of judicial work—deciding on claims, on validity of contracts, etc.—and he must obviously be an advocate of the High Court. What chance has the Local Government got of judging of the merits of rival candidates for such a post? They must have the concurrence of the Chief Justice who is obviously the only person fit to judge, and to my mind, the provision in the Bill is merely a crude attempt to derogate from the privileges and dignity of the Chief Justice.

Under the new constitution, moreover, the Local Government in this case will mean a Minister who may be totally ignorant of the state of things in the Bar and in Calcutta.

It has been said that the Administrator-General and the Official Trustee are appointed the Local Government, but then these officers have no judicial functions.

(3) **Dual control.**—This is obviously unmeaning, and may be fraught with immense mischief. I need hardly labour the point.

(4) **Transfer of the funds.**—Here again there is a confusion of facts and ideas. Ever since the Act of 1909, all dividends unclaimed for 15 years have *annually* been credited to the Government of India under section 122 of the Act.

It is the previous fund (amounting to 37 lakhs) and its accumulated interest (amounting to another 37 lakhs) to which the glances of the Local Government are directed. But then where is the justice of the proposal?

If the money is to be utilised for any purpose other than that of the non-claiming creditors, surely it ought to be utilised for the purposes of the High Court. Our Judges complain they are underpaid, the Court is suffering from a lack of much needed accommodation, there is a paucity of ministerial officers which retards the efficient working of the Court, there is a total absence of amenities for the public frequenting the High Court and for the lawyers—there is not a single lift in the building, for instance—and the money should if at all be utilised in improving the state of things in the High Court instead of being swallowed up in the general revenue of the province and helping to swell, say, the Police Budget.

**Clause 3.**—I do not agree to the suggestion of taking security from a salaried wholetime officer of Government. No Treasury Officer, no Registrar, nor the Administrator-General has to give security—why should an exception be made in this particular case?

**BENGAL LEGISLATIVE COUNCIL  
DEPARTMENT.****NOTIFICATION.**

No. 2769L.C.—24th November, 1936.—The following report of the Select Committee on the Bengal Non-Agricultural Lands Assessment Bill, 1936, to whom the Bill was recommended with the Bill embodying amendments recommended by the Committee, is hereby published for general information.

**Report of the Select Committee to whom the Bengal Non-Agricultural Lands Assessment Bill, 1936, was recommitted.**

*(References to clauses of the Bill are to be read as references to clauses of the Bill as previously reported by the Select Committee.)*

We, the members of the Select Committee of the Bengal Legislative Council, to whom the Bengal Non-Agricultural Lands Assessment Bill, 1936, was recommitted by a motion carried in the Bengal Legislative Council on the 9th November, 1936, have the honour to submit this our report with the Bill as amended by us annexed.

2. The Committee met on the 14th and concluded its sittings on the 16th November, 1936.

3. We do not consider that the Bill has been so altered as to require republication.

4. The further changes made in the Bill on recommitment are detailed below :—

**Clause 2(5).**—An alteration has been made in sub-clause (b) in view of the difficulty which may arise in determining whether a particular school or institution is “charitable” or not. The new sub-clause (aa) which we have inserted in clause 20(2) should be read in this connection.

Sub-clause (d) has been modified in order to make it clear that the banks of a tank are not excluded from the definition of “non-agricultural land.”

**Clause 3.**—In sub-clause (a) (i) and (ii) we have reinserted the words “or any” before “non-agricultural lands” as our attention has been drawn to the fact that it may not be desirable in all cases to pass an order for estimating fair rents in respect of *all* non-agricultural lands in an area. It is preferable to retain the power to exclude particular classes of non-agricultural lands.

**Clause 4.**—In sub-clause (d) we have reduced the rate of rent which is to be taken into consideration from four *per cent.* to “not more than two *per cent.*” of the market value.

**Clause 6.**—A reference has been corrected in sub-clause (2).

**Clause 10A.**—We have made an important change by inserting new clause 10A. This new clause provides for an abatement of not less than two-thirds of the difference between the previous rent and the rent specified in the roll. This abatement is to be allowed to persons to whom land has been leased for residential purposes and their successors by inheritance, provided that they are in occupation of the land for such purposes. Transferees who are in occupation of such land as tenants of the highest degree, at the time when the first order under section 3 is made in respect of the land after the commencement of the Act, are also to be entitled to the abatement.

As this principle has been adopted in respect of estates to which the provisions of clauses 9 and 10 are applicable, it seems proper that the same principle should be extended to clause 7, and that the rents specified in the roll for the tenants of the highest degree (which are to be treated as the assets) should be deemed to be reduced in the case of those tenants who would be entitled to an abatement in an estate to which the provisions of clause 9 or clause 10 are applicable. We have included sub-clause (3) in clause 10A accordingly.

**Clause 20(2).**—New sub-clause (aa) is consequential on the change made in clause 2(5)(b).

NOTE.—The signatures of Babu Kishori Mohan Chaudhuri, Maulvi Tamizuddin Khan, Maulvi Abul Quasem, Rai Bahadur Satyendra Kumar Das and Mr. Narendra Kumar Basu had not been received up to the time of printing the Report. Mr. W. H. Thompson and Mr. C. K. Nicholl have since resigned their seats in the Council.

**Joint minute of dissent by the Hon'ble Sir Brojendra Lal Mitter, Mr. J. B. Kindersley and Mr. G. C. Hooper.**

**Clause 10A.**—We are unable to agree that the concession given by this new clause in regard to lands leased for and used for residential purposes should be extended to transferees who had purchased or otherwise acquired the title up to the date of the first order made under section 3 of the Bill. The concession should be allowed only to those transferees who had purchased—or otherwise acquired title to the land—on or before the date of the commencement of the Act, the reason being that those who purchase or otherwise acquire after the commencement of the Act do so knowing that they will have to pay the full estimated rent.

**Clause 4(d).**—We are unable to accept two *per cent.* of the market value as a maximum limit for consideration. If a limit of this kind is to be incorporated, it should be not less than six *per cent.* as in the original Bill. We do not object to the omission of any limit.

**Minute of dissent by Mr. S. M. Bose, M.L.C.**

After careful reconsideration, I think that the transferee in occupation of the land as a tenant of the highest degree *at the time when this Act is passed*, and not at the time when the first order under section 3 is made (as recommended), should be granted the concession under clause 10A. The first order under section 3 may not be made till after a considerable interval of time after the Act is passed, and during this interval, there are sure to be many speculative transactions with the land. I do not consider it advisable here to depart from the salutary principle that the provisions of a statute should come into operation from the time the statute is made operative.

**Minute of dissent by Babu Premhari Barma, M.L.C.**

In case of lands used for residential purposes it has been proposed by clause 10A to give an abatement of not less than two-thirds of the difference between the amount of rent which was payable before the order under section 3 was made and the amount payable according to the roll by a tenant of the highest degree in respect of such land or part; but in my opinion by such abatement also there will not be any limit to the enhancement of the rent. I, therefore, suggest that a limit should be fixed for enhancing the rents of lands used for residential purposes, and my suggestion is that in such cases, the estimated rent should not be realisable by more than one hundred *per cent.* of the existing rent.

**Minute of dissent by Babu Khetter Mohan Ray, M.L.C.**

**Clause 3.**—I would suggest the substitution of the word “settle” in place of the word “estimate” in clause 3 and in other clauses wherever the word “estimate” occurs. The provision of estimating rents will cause a feeling of uncertainty as the rents estimated (and not finally settled) are not capable of realisation through Civil Courts. The landlords will not be able to recover the amount which they will be required to pay to Government. For these reasons I would also suggest the deletion of clause 11.

**Clause 4.**—There is no limit or restriction imposed on the powers of the Revenue-officers to enhance the rent. If after considering the facts mentioned in clause 4 the Revenue-officer is inclined to fix the rent much higher than that paid in the vicinity or at a percentage much higher than what has been prescribed in sub-clause (d), there is nothing in this Act to restrict him. Besides, the introduction of the method of assessment on the basis of the market value is an unpopular measure and has been denounced by many public bodies in this country and this method of assessment will, I fear, abnormally increase the rents of lands used for residential purposes. I would therefore suggest that in order that the rent of residential tenants may not be unduly harsh and oppressive, the following provisos should be added to clause 4.

**Proviso 1.**—Provided that in areas outside Calcutta and the districts of the 24 Parganas and Howrah the fair and equitable rent settled by the Revenue-officer in respect of lands used for residential purposes and held by tenants immediately under the Government shall in no case exceed hundred *per cent.* of the existing rent.

**Proviso 2.**—Provided further that the rent settled under this section shall not be enhanced during a period of not less than thirty years.

**Proviso 3.**—Provided also that in settling fair and equitable rent the Revenue-officer shall consider any oral or documentary evidence adduced by the party concerned.

**Clause 10A.**—The wording of this clause is not happy or comprehensive. The temporary cessation of occupation should not preclude any person from the benefit of this clause. The tenants are on occasions compelled under the stress of circumstances to let out temporarily their homesteads either in full or in part. Generally a Government officer has often to live away from home on duty. A tenant has also to stay away from home for a change of air, education of children, or in pursuance of business or for various other reasons. There are also cases where on the death of a tenant his family has been compelled to live elsewhere. Is the house to remain vacant? Municipal or union board taxes and cost of repairs shall have to be paid. The temporary letting out of the house either in part or in full should not therefore debar a tenant from claiming the benefit of clause 10A. The words "leased to any person" should be clarified. Perhaps in ninety *per cent.* of the cases of lands used for residential purposes the origin of the tenancy has been lost in antiquity. But the lands have been used for residential purposes from time immemorial. It will therefore be difficult—nay impossible—to prove that particular land was leased for residential purpose excepting long user.

I would therefore suggest the addition of the following explanation to clause 10A.

**Explanation 1.**—The temporary cessation of occupation due to letting out temporarily the homesteads either in full or in part shall not be a ground for depriving the tenant of the benefit of this section unless the tenant is permanently deprived of the occupation of the land.

**Explanation 2.**—"Lands leased to any person for residential purposes" include lands used for such purposes from time immemorial.
